EXERCISE 19

What is your typing power? Your rate of typing will vary from time to time, but you can get an average rate to use as the basis for your goal for the next major section of the work to be done. Type a paragraph under time. See how many strokes you write; then set as your goal the strokes that you type plus fifty. Since you count fove strokes as one word, this is the equivalent of saying that you will add a word each day for the next ten days of practice. For the present, set your goal in terms of gross strokes. You will learn later how much you will be penalized for each error you make. Type as well as you can, but type without fear of making errors.

Date March 24 1945

1. There are few people who were interned at the Los Baños Camp who have not received help of some sort from servants, friends or former associates who were not interned, and it is desired that an official record be made for both Army and Navy files of the names of people, irrespective of nationality or position, who have given proof of their loyalty and their desire to be of assistance to the internees.

2. It is therefore requested that all those who are interested in the preparation of such a record, fill out the form given below in duplicate.

3. The original should be marked "Army", the copy "Navy" and both copies should be delivered as promptly as possible to Committee Headquarters.

Name	Former Position	Address if known	Means of identification if address unknown	Nature of assistance
Pelagio Dimeros and wife	Family Servant later Landlord	H Del Pan St Pedro Macao		Allowing my family to occupy home for 3 years without asking for the rent. Bringing gifts to St. John and heavily contributing to the burial of my wife

Attorney Sanzona	Att at Law	"	well known attorney	furnished food and money.
Mrs Sanzona Mr + Mrs Escano	Mrs E. was the principal of Davao Cent School -	"	Mr E. now has a drug store	"

Dr. Dixon opened a hospital in her private residence after the Mission Hospital had been taken over by the Japanese. She did it for the sole purpose of giving medical attention to the internees. She gave our sick nourishing food and the best of medical attention. This hospital was also a meeting place where contact was made with friends who in turn gave the camp both food and money. [We had to subsist ourselves for the first 9 months then the Japs gave us 25 centavos $12\frac{1}{2}$ ¢ a day. Dr. Dixon was slapped and threatened by the Japs but she continued to serve us until we were transferred to Manila. ~~two years after our internment~~ For the first 9 months Mr. Dixon was our outside buyer. He personally made the market purchases for us and delivered his purchases to the internment camp. Gifts left at the hospital would find their way into camp through him. Like his good wife he was subjected to all kinds of abuse because of his friendship for us. If these people are alive they should be given special recognition.

C

'BOONDOGLING ON A GLOBAL BASIS

by Henry J. Taylor, War Correspondent
for North American Newspaper Alliance.

I HAVE just returned home after observing the impact on European minds of American promises regarding what the United States will do for the people of the world after the war. In our deep anxiety to be helpful to the world, we are making promises and assuming superior attitudes which America and the world will deeply regret. We are speaking and writing glowingly about postwar matters concerning which we shall actually have little, if anything to say.

The problems abroad are astronomical. They are deep rooted in historic tensions, charged with local prejudices and ardors which date far back, and full of crosscurrents and contradictions. Any one of these local problems - economic, social, political or military - is enough to baffle any European. Yet American words and pens are distributing promises everywhere.....

"We cannot solve Europe's basic problems or "make the world free." The destiny of Europeans is within themselves. And so is the destiny of their world-wide colonial system.....

For a country whose own cities are in the most deplorable condition in their history, with vastly rich areas like Boston, Detroit and Philadelphia facing financial crises in spite of maximum employment and maximum taxes, our government planners go far afield in trying to solve the colonial problems for the world..

The attitude of some of our politicians and speechmakers concerning our allies' colonies, mandates and dominions is already building up vast problems in these places. America's social theorists, tying themselves to our war effort in the colonies of our allies, are creating vast confusion and disturbance abroad. Their folly is working against every solution which our allies may find for their own problems in their own lands.....

Here at home we shall be faced by every sort of readjustment. We must provide jobs for the returning American soldiers and for our present war-workers. We must work tirelessly to regain our solvency and to recover from the present huge drain on every resource we have. In this alone we face the greatest task in our history. We shall be in no position to lift the standard of living in China, in Russia, among 400,000,000 impoverished people of Europe, desirable as that is. There is no possibility whatever of our succeeding in such an attempt. There are a hundred places to start and no place to stop.....

The obligation to assist toward a better world and the value in doing so are obvious. Our duty, however is to be useful, not according to our desires but according to our powers. We should recognize our own limitations and abandon the impertinent idea that a world is to be built in the American concept. We should put a limit on our total postwar aid, both in time and in dollars, and require that any aid should be restricted to whatever nations took certain elementary steps in their own behalf. Only thus can we make good our promises. Only thus can we maintain our own integrity and win the respect and friendship of the world.

The global concept, stimulated by the war itself and by the new idea of the world's size in the Age of Air, is one of today's basic developments. It is one of the great generating thoughts in the history of man. But how could anything be more evident than that the process of achieving universal freedom and pros-

erity must be slow, and that to promise it overnight is a great disservice to the world? Our policy of 'exaggerated internationalism' is as dangerous, foolhardy and destructive as narrow isolationism.

"INCENTIVE PAY":
by William Hard

For More War Production -- For More Peace Prosperity

SOMETHING has to be done to make war production 'per worker' go up. Till now the theory often has been: "In order to get more war production, just fork more men into our war plants." That theory is nearing its end. Our armed forces demand two and a half million more men in the next 12 months. Agriculture, if it is to feed this country and help feed our allies, cannot provide one of those men. Our civilian industry soon will have only enough men to supply us with our strictest civilian necessities. Meanwhile our war industry, to keep pace with our armed forces, must step up its production. There is only one solution:

Our war plants must produce more 'per man'.

Mr. Charles E. Wilson, president-on-leave of the General Electric Company and Vice Chairman of the War Production Board, is urging war industries to adopt "incentive pay" - that is, to pay workers more if they 'produce' more.....

President Roosevelt, at Mr. Wilson's suggestion, has authorized "incentive pay" and has exempted it from his "hold-the-line" rule against wage increases. The National War Labor Board is granting "incentive pay" wherever it can be shown to be really an "incentive," really a route to greater productivity.

We need that greater productivity acutely. Ought not management to try to get rid of the idea that a worker can earn "too much"? Ought not labor to try to get rid of the idea that it is a bad thing if management makes "more"? Here is a case in which both sides can make "more." If Mr. Wilson can sell "incentive pay" to the country, he will be one of our great architects of victory.

And also of prosperity after victory.....

WHAT ENGLISH GIRLS THINK OF THE WAACS

"We've never had so much fun in our lives," they say -

WHEN a pretty Waac, fresh from the States, entered a London Red Cross Club recently, you should have seen the rush. The American boys left us English girls high and dry while they jammed around the Waac, looking at her hungrily, as though she were a pineapple-upside-down cake or some other American dish they are always talking about.

Later, when she had escaped the crush, the Waac and I had a woman-to-woman chat.

"What do you British girls think of American soldiers?" she asked me.

I did my best to answer her honestly. I'm fairly typical of the thousands that American boys are meeting in the British Isles. I am 18 years old, blonde and reasonably pretty. For almost a year I've been dancing two nights a week with American boys in the Red Cross Club; on other nights I often go to the pictures or to dinner with them. Sometimes they come to my home for tea or a game of monopoly. Altogether, I've now met hundreds of them. In some respects I think they're even nicer than our English boys; in others not so nice. But Americans certainly are 'different.'

There's the dashing way they approach a girl. An English

insists on being formally introduced and he would never dream of calling you by your first name until he had been out with you several times. But the first time American boys meet you they say, "Hiyah, Gorgeous!" or, "Where did you get that sweet little face you're wearing tonight?" During the first five minutes they're likely to give you some such nickname as "Slim" or "Monkey-face" or "My little ball of fire."

The first American boy I met utterly appalled and bewildered me. His name was Eddie and he had an attractive freckled face with an upturned nose. "Let's get hot, Dot," he said, seizing my hand. "Let's show 'em how to cook with both burners."

I hadn't the dimmest idea of what he was talking about.....

What I didn't understand at the time was that many Americans have a "line" of the most outrageous flattery which they don't really mean and which, in turn, they don't expect you to take seriously. As a result, some English girls think Americans are tickle and insincere. But I've learned that isn't true.

Another thing we love about American boys is their devotion to their mothers. Nearly every one of them shows you a picture of his mother within five minutes of meeting you. English boys seldom speak of their mothers, fearing it might be considered sissified. We girls like the American attitude better. Their adoration for their "kid sisters" is also touching. In England big brothers are inclined to regard their younger sisters as horrid little nuisances.

Americans are so simple and friendly that we are finding it amazingly easy to entertain them in our homes.....

I've never had so much fun in my life as I've had since the Yanks arrived, and I know that thousands of other girls in England feel the same way about them. But American girls needn't fret about the competition here. We're still very loyal to our own English lads, and most American boys couldn't see us at all if there were American girls around.

AMERICA IS BEING MADE OVER -- AND WE WON'T LIKE IT

by Joseph C. O'Mahoney
United States Senator from Wyoming

IN 1922 the Department of the Interior secured Congressional approval for the establishment of the Grand Teton National Park in Wyoming. Ever since then it has sought to extend the park's bound-

aries to include more land than the Congress, the State of Wyoming or the County of Teton was willing to set aside. Every effort failed.....

What happens to Teton County is not a matter to arouse national concern. But it is typical of what is happening in every phase of its activity, from the smallest local matters to the greatest international problems. Policies are no longer being determined by the people or their representatives, but through Executive order by employes of the Executive arm of the government. These officials are neither chosen by nor accountable to the population they govern.

In the last ten years, the Executive branch has issued nearly 4000 such orders. That number of 'orders' is almost equal to all the 'laws' passed in that period by Congress. The regulations which - by uncounted thousands - have sprung from these orders already fill 20 fat volumes.

Unlike our laws, these orders were not publicly debated or voted on by the people's representatives. They were prepared in secret by persons unknown, and announced by the 110 order issuing agencies of the Executive. They are Executive "laws" which our national law making body never saw until they were published.

By them, America is being made over.

The life of every man, woman and child in America will be affected by the kind of peace that follows this war. For the people's protection, the Constitution prescribes that treaties must be ratified by a two-thirds vote of the Senate. But today we are being internationally committed, not by vote, but by order. Behind the curtain of Executive secrecy, a whole network of Executive agreements with other nations is being contrived. As a result, there may never be a peace conference or a peace treaty upon which the people may pass judgement.....

Recently Congress voted almost unanimously to extend for another year the life of Lend-Lease. We did that because Congress knows that whatever success our allies gain is our success, and because we are determined to use every available means to speed victory.

But Lend-Lease, which was created by Congress as a wartime measure, has become a gigantic financial instrument of the Executive by which, without the advice or consent of Congress, the global shape of things to come is being prepared. Congress has appropriated 18 billion dollars for Lend-Lease. But from funds appropriated by Congress for other purposes, some 50 additional billions have been transferred to this agency by Executive order.

What is ominous is that this vast operation and its final settlement may be used for purposes on which Congress has never been allowed to vote or the people to voice their opinions. The President, in the final accounting, can accept repayment in kind or in property - or he can also write off the whole bill, in exchange for "any direct or indirect benefit to the United States which he deems satisfactory."

How far the President can go in making international political use of these American billions can be gathered from Art. VII of the agreement which the Executive signs with every recipient nation. That article provides that the final settlement of this debt to us shall be such "as to promote mutually advantageous economic relations and the betterment of world-wide economic relations; to further the elimination of all forms of discriminatory treatment in international commerce, and the reduction of tariffs and other trade barriers; and in general to promote the attainment of all the economic objectives set forth in the Joint Declaration made on August 14, 1941 by the President of the United States and the Prime Minister of the United Kingdom."

That article was never submitted to Congress. Nonetheless it pledges American resources for the world-wide enforcement of the Atlantic Charter and whatever else the Executive may decree.

The back of the Luftwaffe was broken that day in August. Only one real aerial attack has been launched on Britain since then, and our planes have been able to make daylight sweeps over France with much less opposition than they met before. The magnificent Focke-Wulfs and the trained German pilots lost that day were not expendables.

General Eisenhower studied every move of the Dieppe operation in planning the North African campaign. In fact, he was big enough to ask Mountbatten and his staff to help him plan that venture. Mountbatten had already considered a large-scale raid against the places finally attacked. He had made a plan which he turned over to General Eisenhower. Three days after the Americans had landed in northern Africa, Eisenhower sent Mountbatten a cable of thanks for his help. By inference he was thinking of the men who had died at Dieppe: It would be safe to say that many American lives were saved in North Africa because of lessons learned in the dress rehearsal at Dieppe.

Many articles were included which did not pertain in any way to the war effort. Some of these follow:

LEESVILLE AGAINST SYPHILIS - Collier's.
FEUDAL HAWAII, PARADISE? ETC. - by Stanley High.

"WE REGRET TO INFORM YOU...."
(Condensed from The American Legion Magazine)
by Feizer Wright

The Casualty Branch of the Adjutant General's office occupies three and a half floors of the Munitions Building in Washington. Here are filed the basic army records of every U. S. soldier. When a soldier leaves the United States the Branch receives his Personal Property Card, which was filled out at the port of embarkation. This card serves as a double check on the soldier's name and serial number in case of a casualty report.

Several times a day, between 7:45 a.m. and 11:45 p.m., a courier with an armed escort arrives from Signal Corps headquarters in the Pentagon Building. In his locked pouch is the latest casualty report, flashed by radio from U. S. Army headquarters in the various theaters of war. Within two hours a telegram is on the way to each next of kin, unless there is some question as to a report's accuracy. In that case it is a job for the Verification Section. No telegram is sent if there is room for doubt.

When the telegram is sent, it may read thus:

THE SECRETARY OF WAR DESIRES ME TO EXPRESS HIS DEEP REGRET THAT YOUR SON PRIVATE JOHN J. DOE WAS KILLED IN ACTION IN DEFENSE OF HIS COUNTRY IN NORTH AFRICAN AREA MAY 6. LETTER FOLLOWS.

THE ADJUTANT GENERAL

The letter confirming the telegram may add:

"The date and place of burial or other particulars are not known....Please be assured that when additional information is received you will be notified promptly. I extend my deep sympathy."

The letter, signed by the Adjutant General, will enclose a bulletin explaining that, as the beneficiary named by her son, Mrs. Doe will receive a gratuity amounting to six months of John's pay and allowances, in addition to whatever insurance he carried.

The bulletin also informs Mrs. Doe that the local chapter of American Red Cross stands ready to advise and assist her and that emergency financial aid may be obtained from Army Emergency Relief. She is advised that she need not employ an attorney or claim agent.

If Johnny is wounded, missing, or a prisoner of war, the telegram that goes out follows much the same form...

Progress reports on wounded soldiers are sent to Washington from overseas headquarters at least once every 15 days. If a report on a wounded man is not forthcoming, Casualty Branch officers radio overseas for information. They do all in their power to shorten relatives' days of anxiety.

In the follow-up letter to the wounded's next of kin is a form on which they may send five-word messages to the boy at government expense. Additional messages are permitted after each progress report. "Becheerful" is the department's only restriction.

Every effort is made to insure that the casualty's emergency addressee is the first to be notified, and that the notification comes first from the government rather than from other sources....

Many soldiers reported missing in action return unharmed to their own lines; others show up wounded; still others have been captured. A flier missing over a vast expanse of water may be presumed lost; but one missing pilot in the island-dotted southwest Pacific returned to his base, via a

chain of islands, after 320 days.

If the missing man is a prisoner of war, his name will eventually appear on a list cabled by the International Red Cross in Geneva to the Prisoner of War Information Bureau in the Provost Marshal General's Office. This list is turned over to the Casualty Branch for notification of next of kin. Thereafter the Information Bureau supervises the transfer of mail and parcels to him.

A man who is missing may continue to be classified in that status for a year. The law then requires a review of the case and, if the evidence and circumstances warrant, authorizes a presumptive finding of death. Last May, Casualty Branch considered the cases of the thousands of men still listed as missing in action in the Philippines and in each case reported: "In view of the topography of the Philippine Islands, the meager information presently furnished by the Japanese government regarding prisoners of war and casualties, and the fact that individuals have escaped from Japanese-held territory, this man may reasonably be presumed to be living."

As this report indicates, Japan is a violator of the Geneva Convention, which she signed but did not ratify. Such prisoner lists as she has seen fit to provide have called forth all the ingenuity of Casualty Branch to decipher correctly. Between the Axis powers in Europe and the Allies, however, there have been few causes for complaint.

Sometimes the German government reports through Geneva that an American flier who is a prisoner says certain of his comrades were killed. Uncle Sam takes that with a grain of salt: he knows that fliers misinform their captors if they believe they can thereby help their comrades to escape. Not long ago two American fliers who had been forced to take to their parachutes over occupied Europe made their way back to England. Uncle Sam was doubly happy to get the news. He was glad they were alive, and glad he hadn't told their families they were "dead." That's the way he does things. If Uncle Sam tells you, you can believe it.

TOO MUCH WISHPFUL THINKING ABOUT CHINA

by Hanson Baldwin (Military critic of
The New York Times)

Sobering facts every American should know about the military situation in China.

"Oh, we'll send lotsa planes to China and bomb hell outa Japan..."

That seems to sum up the average American's airy strategy for victory in the Pacific.

He believes, once Germany is defeated, that China can readily be transformed into an enormous air base from which Japan can be bombed into submission. He looks upon the Chinese army as an integrated fighting force and believes that once we reconquer Burma we can ship in enough supplies to enable the Chinese to win and hold the airfields we shall need. He thinks the Chinese have won great victories against the Japanese, or even that they are slowly winning their

Unfortunately, the China of such dreams is far from reality. Missionaries, war relief drives, able ambassadors in the movies have oversold us. China has become not merely China but the royal road to victory in the Pacific.

China has needed no such overselling. Her people are mainly courageous; their patient fortitude and philosophic resignation are unmatched. But an enumeration of her virtues

should not blind us to her weaknesses; above all, it should not lead us to a fallacious conception of Pacific strategy.

China is not a nation in our sense of the word but a geographer's expression. She has not won, and is not winning, the war with Japan; is not - in our sense - winning battles, but losing them. She is not now, and can never become, a great air base from which Tokyo can be bombed into submission unless we can open great new supply routes. Nor will it be sufficient merely to 'supply' China. She has as yet no real army as we understand the term; most of her troops are poorly led and incapable of effectively utilizing modern arms. They require intensive and protracted training, and capable leaders bound together by a common loyalty to a common cause. Today there are few such leaders; too many of them are still old war lords, in new clothing, for whom war is a means for personal aggrandizement and enrichment.

The truth about China - known to a few, but not to millions of Americans - is that the military situation there today is bad, has been bad for two years, and will probably continue to be bad for some years to come. Japan holds nearly all the worth-while parts of the country, all that she wants to hold. The Japanese have not made the mistake the Germans made in Russia - an attempt to win an unlimited victory....

The Japanese are not losing battles to the Chinese. They are maintaining an active defense and at the same time are using China as a training ground. Whenever it seems desirable, a Japanese garrison conducts a punitive foray into unoccupied China. Sometimes such an expedition gets mauled, but usually it captures its objective, disperses the Chinese forces, loses some men and perhaps some equipment, and then retires to its original position, having given troops invaluable training...

All this does not spell hopelessness. The Chinese spirit has not been broken. As long as the United States fights the Pacific war with vigor, there is little likelihood that Japan can force China entirely out of the war. Nor can the Japanese occupying force be greatly reduced so long as Chinese guerrilla activity continues and Chiang Kai-Shek and the Chungking government retain any influence in occupied China. The simple fact - that some 15 to 22 Japanese divisions, perhaps one fourth of the Japanese land strength, are thus tied down - is China's great and continuing contribution to victory. It is a contribution which must never be underestimated; if China were to be forced out of the war Japan could concentrate her whole strength against our amphibious attacks.

But the Japanese will never be expelled from China by the present Chinese armies. Hundreds of thousands of these are guerrilla forces owing only slight allegiance to the Chungking government, or are loosely organized followers of some provincial general, fighting chiefly for loot. When active they are a thorn in the flesh of the Japanese, but no more than that.

Two or three Chinese divisions in India, in part the remnants of the armies which tried to defend Burma, have been well-trained and equipped by American officers under Lieutenant General Stilwell. There are some other fairly good Chinese troops in Yunnan province near the Burma border, and a few more around Chungking and along the Yangtze.

Our own experience has shown quite clearly that the Japanese cannot be beaten by half means. Driving the 20-odd Japanese divisions in China back to a point where we could utilize bases within easy range of Tokyo would call for the creation of a great army as well as a great air force in China. Such an army would have to be equipped and strengthened by American technicians and American combat troops, if air bases were to be held. The Japanese campaign of last year following the Doolittle Tokyo raid showed that, Doolittle and his men were scheduled to land at airports prepared by the Chinese in unoccupied territory; for a time after the raid the Japanese apparently believed the bombers had come from those fields. The Japs organized one of their punitive expeditions, easily pushed into the Chinese territory destroyed the airfields (by digging small canals through them) and then retired to their original positions. If the regular bombing of Tokyo were to start now, or if General Chennault's American air force would become a threat to Japanese supply lines, the enemy would promptly move to seize the air bases. There is little military power in China to stop them.

But the real, almost insuperable, problem is supply. China is virtually isolated from the rest of the world. The only practical supply route open today is over the Himalayas by air from India, and its difficulties can scarcely be imagined. Planes must carry enough gas for the round trip. Airfields are inadequate. Flights must often be made at altitudes as high as 16,000 to 24,000 feet, thus reducing payload. Weather conditions, particularly in the monsoon season, are terrible, with masses of clouds, high winds, rain and low visibility. And Japanese planes based on airfields in Burma constantly threaten our transports.

Nevertheless, with herculean labors and great bravery, the Air Transport Command and the China National Aviation Corporation have established a "going" air line into China. It is probably carrying about one third as much cargo tonnage as was once brought in by the Burma Road, which used to average about 200 tons daily. The amount is being stepped up steadily; but even if the air lines should eventually boost their capacity to three times that of the Burma Road, it would not be enough to support a ground army. 'ONE' ground division in active combat will consume about 700 tons of ammunition per day...

Before China can become the base for a victorious drive on Japan, we must find other routes of entry. The east coast ports, like Canton, which used to admit about 1000 to 2000 tons of supplies per day, are all in Japanese hands. Short of a tremendous amphibious campaign there is no hope of recapturing them. A number of rail routes have long been planned, but before any of them could be started Burma and/or the Malay Peninsula, Thailand and French Indo-China would have to be reconquered. And in those jungles and steamy vastnesses, the enemy might be able to hold out for years. There are many roads to Tokyo, but the one through China is perhaps the hardest - a road of many turnings.

The plain truth is that Japan is both a great continental power and a great sea power. She must be beaten on land and 'at sea'. Only if Russia enters the Pacific war can continental power easily be brought to bear against Japan's continental power. At sea the task is certainly ours, and on land we must provide major aid.

Japan's holdings are now almost encircled by United Nations positions. It is our job to tighten that ring. The Japanese citadel must be attacked from many directions - from Australia and the Solomons, from the Aleutians, event-

ually perhaps from Russia, from India and from China. But the main effort will be westward from Hawaii and Midway - a direct thrust against the heart of Japan.

China will play its noble part in this strategy of encirclement. But it would be calamitous if the American people expected China to play a decisive part - the main part.

We must face the fact that the chief burden of victory in the Pacific rests upon ourselves alone.

LAST DAYS OF SEVASTOPOL

A condensation from the book by Boris Voyetekhov

For more than eight months, Sevastopol held out against a powerful German army which had expected to take the city in a week or two. The valor of Sevastopol's defenders prevented the Germans from carrying out their plan to drive on Stalingrad and the Caucasus oil fields in the summer of 1942 and was a contributing factor in the disastrous German defeat at Stalingrad later in the year.

Boris Boyetekhov, brilliant young Russian journalist, arrived in the doomed city by destroyer in its last and greatest hours. His story is an eyewitness account of one of the war's most frightful - and most exalted - episodes...

WHAT'S WRONG WITH MANAGEMENT?

A Reader's Digest Symposium

"I am a human being, not a machine! I am a partner in America's war production, why can't management treat me as such? We're supposed to be shoulder to shoulder in a democracy, but management doesn't act that way."

Through hundreds of the letters pouring in to The Reader's Digest symposium on "What's Wrong with Management" runs the same indignant plea of intelligent men and women aroused to protest because their sense of dignity, their strong feeling of personal importance, is being lacerated. Scores of writers express their relief at a chance to speak out. They are far from being embittered or "radical"; they are analytical, eager to help solve troubles.

Below are excerpts centering around the single, major complaint: "Management doesn't realize we are human." Some of the other dominant complaints will be discussed in future issues...

AMERICA' FIRST SPOILS OF WAR

Condensed from The United States News

America already is rich in war booty seized right here at home. This booty is so vast that no one has ventured to strike its total, but its value is estimated at upward of \$3,000,000,000.

A few hours after bombs fell on Pearl Harbor, agents of the Office of Alien Property Custodian swooped upon enemy-owned industrial plants, warehouses, banks and stores. About \$200,000,000 worth of scarce war materials - aluminum, steel, steel forgings, machine parts, chemicals - was cached in warehouses and factories. These materials were channeled at once into the U. S. war effort.

Other seized properties included some 300 going business concerns. Half of these were manufacturing companies, some of which were needed in the war effort. These were kept

running - but disloyal officers and employes were replaced by representatives of the OAPC and by reliable private citizens.

Meanwhile, OAPChas' offered American businessmen more than 40,000 seized enemy patents and patent applications. They are not to be sold; but any American can obtain a license to put one of these patents to work upon payment of a \$50 fee, and no royalty is charged. The patents cover a broad field, from amusement gadgets to hoisting cranes and involve chemical processes, electronics, radio, plastics and textiles. There is one patent for a tennis ball which "practically won't wear out," and there are 22 patents for zippers...

The list of war prizes runs all the way from cameras taken from interned enemy aliens to ships. Twenty-nine German and Italian ships are in regular wartime service. ...

GLORY THROUGH HARA-KIRI

Adapted from "Close-Up of the Jap Fighting Man" -
by Lieut. Col. Warren J. Clear

THE recent mysterious death of Admiral Isoroku Yamamoto, Japan's No. 1 military and naval strategist, has been variously explained. But Robert Beelaire, former United Press chief in Japan, reports that Yamamoto frequently said he would take his own life rather than lose any Japanese-held territory.

Many instances of "honorable suicide", by Japanese officers have been observed in this war. The only Jap commissioned officers taken prisoner have been unconscious or badly wounded. A Tokyo communique announced that the sick and wounded soldiers on Attu killed themselves before the last American attack - probably on orders from their officers. Crews of Jap planes shot down in the Pacific have refused life lines thrown to them by Americans. Several officers entrusted with the air-raid defense of Tokyo committed hara-kiri because the shadow of the wings of Doolittle's bombers fell athwart the Imperial Palace.

The ancient custom of hara-kiri is typical of the Japanese ruling caste. Day after day from earliest youth, the samurai are drilled in the awesome details of the tragic ceremony. So vividly is the technique of self destruction impressed on boyish imaginations that, when Jap officers are confronted with what they consider the necessity of performing it, they can meet the terrible ordeal with complete composure.....

NAVY HEROES IN DIVING SUITS.

Exploits of the Men Who Work in Lonely Peril Under Water to Salvage Our Sunken Ships.

THE RAISING of the ships sunk at Pearl Harbor was a great naval victory, the equivalent of sinking a whole enemy fleet. It was won by Navy Salvage.

This branch of the service - which somehow misses the headlines - is daily winning other battles up and down the seven seas. Off the coasts of America alone it has raised and returned to service a greater tonnage in freighters and tankers than that of the warships saved at Pearl Harbor.....

SPORTS RETURN TO 1900

INTERCOLLEGIATE sports have been curtailed - there will be few cars parked outside the Rose Bowl 'next' New Years Day. Because the army and navy - who run American education today -

insisted, the colleges at last are forced to set up a program of athletics for all students in place of the semiprofessional circuses for exhilarated graduates on Saturday afternoons. That means softball and touch football, and games that have value in after life, like tennis and squash. It also means the boys will not be exploited in order to raise a lot of money at the box office. The "overemphasis on athletics" has been abruptly removed.

The rest of us, too, will have to change our thinking about sport. The effect will be less painful and more beneficial than many other impacts of the war. We shall have to find our recreation in our own back yards.--in croquet, deck tennis, horse shoes, lawn bowls, softball, volleyball. We shall play these games with family and neighbors and (who knows?) perhaps discover values in sport that we never knew existed.

And after the war we shall have a golden opportunity to alter the policy of sport for the few and to institute a program of sport for everybody, the only system worthy of a nation calling itself democracy. We might as well begin thinking in those terms now, and start providing facilities for games that do not need grounds keepers, caddy masters or the rest of the professional athletic hierarchy.

HOW DO THE GERMANS FEEL NOW ?

GERMAN prisoners taken in 1943 are not the same as those of 1940 and 1941.

Then, they were truculent, arrogant, supercilious. "The whole world knows we've won the war." they said. When the U.S. entered the war, a young Nazi airman was contemptuous. "The U. S. A., won't be ready for large scale action till the summer of 1943. Neither Russia nor Britian will still be in the war by then." Our big air offensive in the summer of 1942 brought a sudden change. Gone was the truculence; instead was the look of men who were worried. When it became clear that Russia had broken the German offensive, the shock was terrific. Perhaps it took Stalingrad to tell the Germans at home of the change in the war, but the soldiers ~~xx~~ knew in August 1942 that Hitler's plans had misfired.

Newly arriving prisoners now talked freely. For the first time it was possible to converse with them and even to criticize Nazi policy without having them walk away. There is one exception: the slightest critical reference to the Fuhrer is strongly resented.

Three years ago the possibility of defeat never entered their thoughts. Now the specter of 1918 is ever present. The majority, however, still believe in partial victory possible, the argument being that the Allies are not strong enough to take the Fortress Europe. Not until the Allies armies win a foothold on the Continent will the cracks in German morale assume dangerous proportions. But then I think the breakup will come with tremendous rapidity and force.

PAPER IS WAR MATERIAL-DON'T WASTE IT!

THE COUNTRY is fast running into a paper shortage which will cut down your magazines, newspapers and books, restrict the supply of various household necessities, and cause you serious inconvenience.

The United States and Canada can produce only 3/4 as much paper this year as last, because of manpower shortage in the woods. Yet the demand is swollen enormously. Tin, glass, and plastics are unavailable, so foods, oil, paints and scores of other commodities have to be packaged in paper. War industries for example, airplane manufacturers - are using large quantities

ties. But the greatest new consumer is the army. Just for
containers, the army will use this year half as much paper
as all the magazines combined.

The other big users of paper - publishing houses, stores,
industrial plants and the government - already are economizing
under agreement with the War Production Board. 'Yet the real
job of conservation and salvage can be done only with the help
of the American family.'.....

++++++
oooooooooooooooooooooooooooooooooooo

EDITOR'S NOTE - - It is inevitable, in digesting a DIGEST that
certain important or interesting parts would be omitted. The
limitation of time and paper demand it. To prevent arguments
it is well to state here that in compiling this digest, the
effort was made: (1). to include all articles which would
show the temper of the times at home, (2). to give enough in
each article to make the purpose of the article clear. In
addition nothing was omitted considered essential in important
articles. Everything appearing in this digest is a direct
quote from the Reader's Digest.

For the benefit of those who have forgotten, the Reader's
Digest was always a magazine which considered its mission one
both to "point with pride" and to "view with alarm." Perhaps
the healthiest sign displayed in these articles written in
the midst of total war is the clear indication that the dem-
ocratic principles of freedom of speech and freedom of the p-
ress have not been suppressed. If the President is ruling
as a dictator, as he undoubtedly is (so did Lincoln and so did
Wilson) he is permitting an amount of criticism that no foreign
dictator in all history would have allowed for a minute. This
is important.

All the Digests show clearly that (1). there are no
serious dislocations or disagreements at home. (2). the War
is being prosecuted in an efficient determined and business-
like manner. (3). While prosecuting the war with every
resource, postwar plans are afoot to restore the country and
the world to normalcy and to guarantee world peace for the
future.

Thanks of all are due to the owner of those Digests for
making them available for this digest. Please use circumspec-
tion in connection with this work.

File: 780-3A
Title: LISTS OF PEOPLE IRRESPECTIVE OF NATIONALITY OR
POSITION WHO HAVE ASSISTED INTERNEES.
Origin: Los Banos

Name	Former Position	Address if known	Means of identification if address unknown	Nature of assistance
<p>I am a missionary of The Methodist Church. During much of the period of the Japanese occupation I lived with the group of Methodist missionaries at 431 P. Paredes, Manila. We were without salary during this period. Despite warnings of the Japanese to the Filipinos that we were aliens and enemies, the pastors, deacons, and members of the Methodist Church from all over northern and central Luzon gave us large amounts of money and food. Dr. Ernest C. Tuck, Superintendent of the Methodist Mission, can give a detailed list of names and gifts. His address is 150 Fifth Avenue, New York. We were also given help while we were in Los Baños. Some gifts were given by friends not of our church. I give only a few names below, some of our church and some not.</p>				
Dr. Lumerindo Garcia	Physician Mary Johnston Hospital	Zepanto St Manila		Money
Mrs. Antonio Prieto		Lardner St. (?) Manila		Food
Miss Librada Juvaleria	Nurse - Mary Johnston Hospital	Surge Cavite		Food
Mr. & Mrs. J. B. Makaciar	Merchants	1207 Makata Manila		Money - food
Mr. Laya	Pangasinan Prov. English Supervisor Dept. of Education (1941)	Author of His Native Soil		Food

(See explanatory note on back.)

Name	Former Position	Address if known	Means of identification if address unknown	Nature of assistance
Jose Fuentebella	Senator ^{and} Representative	Tigaon Camarines S.		Furnished food, transportation etc.
Ludivico Presentacion	Councilman	Parubcan Lagonoy, Cam. S.		idem.
(It is rumored that this man has been killed by Japanese)				
Filimon Goyena	Merchant	Parubcan Lagonoy Cam. S.		This man ^{and} family nursed me thru severe illness.
Dr. Tolentino	Resident physician Treasure Island Mine	La Hoy Caramoan Cam. Sur		Gave me his last ampules of Emetine to cure my dysentery.
— Suarez	Asst. Manager Treasure Island Mine	C/o Pan-Philippines Management Co.		Furnished food, transportation etc.
Dionisio Narvaez	Retired Teacher	Del Pilar Caramoan, Cam. S.		I lived with this man and his family for 3 months.

Explanatory Note: On May 1, 1942, the Japanese garrison was driven out of Naga, Camarines Sur, ^{by guerrillas} and 31 Americans, including myself, were liberated. Shortly after a Japanese force of about 4000 men was sent into the province to clean up the guerrillas. The liberated American prisoners were obliged to seek refuge in the hills. We were given every possible assistance by the natives who did so at great personal risk to themselves. The names given are only a few of those who helped me.

<p>Dr. E.E. Tuck, Supt. of the Methodist Mission has the official list of donors of money, food, and other supplies to members of the Methodist Mission, in which I shared. These donors comprise members of Methodist Churches all over Luzon, individuals outside, Filipinos and Chinese. Personally, in addition, the following persons gave help.</p>				
Mr. + Mrs. J.V. Makasia		1207 Makata, Manila		money and food (monthly allowance)
Mr. Pedro Lopez + family		1207 Makata		money
Mr. Manuel Austria		Knox Methodist Church		"
Mr. Aquedo Zigu		"	"	"
Mr. Benjamin Zigu		"	"	"
Mr. Solomon Trinidad		"	"	"
Mr. Eliseo De Leon		"	"	"
Dr. + Mrs. Mariano Masa		"	"	" (monthly)
Mrs. Hernacy		"	"	"
Mrs. Fortunata Oliveras		"	"	" (frequent)
Mr. Roman Luisol, Jr.		1438 Dagupan, Dagupan		"
Young People's Fellowship		Knox Methodist Church		"
Married People's Club		"	"	"
Mr. J. Manubay and family		"	"	food
Mrs. Salvacion Haldas		"	"	food
Mr. + Mrs. Henry Tan	Mrs. Tan a student in Fardow, China	749 Tanduay, Manila		money, food + supplies (frequently)
Miss Lillian Huang	"	881 Reina Regente Manila		money + supplies (frequently)
Miss Helen Chen	"	Prim. Chinese Girls' School		supplies (frequently)
Mr. C.C. Isai	student			
Mr. Simon Ting	"			
Rev. + Mrs. F.S. Cordero	pastor	Knox Church		— cared for all my possessions thru period of internment.
Mr. + Mrs. Pio Sagortiza		Knox Church		money + food.
Mr. + Mrs. Alberto Salta		Knox "		— help in moving + packing.
There are probably other persons overlooked, for people were very free.				(note other side)

Pastor & Mrs. Cordero ~~passed~~ in and cared for me while ill with malaria, ~~after~~ other missionaries were interned at ~~San~~ Baños July 8 - Aug. 12, 1944. They risked their lives & positions to protect and care property & help personally. This help was given not only during days, Jan. 10 - 15, 1942 and ~~Jan.~~ ~~1944~~ - Feb. 23, 45, but during the years Jan. 15, 42 - July, 1944, when we had no salary and were as much in need of help as when in actual internment; when also the help they gave was an evidence of their genuine love and loyalty, for they gave knowing they might be "marked" persons to the enemy because of it.

Name	Former Position	Address if known	Means of identification if address unknown	Nature of assistance
Ortiz, R. C. (and wife)	Office assistant and salesman, Pacific Commercial Co., Davao City, Davao. (I had been at one time in charge of the company's provincial sales organization).	Davao City, Davao.	(Well known in town of Davao. Towards end of 1943 was operating a stall in public market.)	At a very critical time during my internment in Davao, supplied me with bedding, footwear, and other necessities and thereafter often sent me cigarettes, coffee, articles
of food, and other comforts; and finally, when he learned that we were about to be transferred to Manila, he sent me P50 cash;--all this entirely unsolicited and at considerable sacrifice and risk to himself and family, as during the latter part of this period the Japanese authorities had strictly forbidden all manner of communication between Americans and Filipinos. Ortiz and his family themselves had lost all their personal belongings during the Japanese invasion of Davao, I was informed.

ADDRESS TO THE CAMP
BY M.B. HEICHERT ON Jan. 7, 1945

LADIES AND GENTLEMEN

As of 3:45 this morning this Camp was officially released to your Administration Committee.

As of 5 o'clock this morning your Committee declares you free.

Under this most unusual release, and until official control of the Camp and this area is taken over by representatives of the American Army we warn you

- First - that we have no news of actual landings on Luzon, although it is now known that we have landed on Marinduque.
- Second- that while the Japanese have actually left the Camp we have no knowledge that they have abandoned the surrounding area and consequently we continue to be in the war zone and subject to all the dangers and risks of actual warfare.
- Third - we may now inform you that we have in operation facilities for getting in contact with our forces by radio and any instructions received, or any definite news will be relayed to the Camp immediately.
- Fourth- it is your Committee's plea that you remain calm and maintain your same organization and same sense of discipline and responsibility in order that the Camp may continue to exist as a unit and to function properly for the benefit and protection of all concerned. To this end an emergency patrol unit has been established and is responsible for order within the Camp. This is potentially the most difficult and dangerous period of our internment and the fullest cooperation of every one of you is earnestly requested.
- We caution you that two Japanese sentries are still at the gate and we are informed that they are attached to a unit which is still in the area. It will therefore be unwise for anyone to attempt to leave the Camp meantime.
- Fifth - Breakfast is at 8:30, lunch at 12:30 and dinner at 5:00 o'clock - with full rations for all.
- Sixth - A further announcement will be made at 10:30 giving the essential details of our new set-up for the camp which is hereby designated as CAMP FREEDOM.
- Seventh-At sunrise this morning there will be a simple flag-raising ceremony in front of Barracks 15. Immediately thereafter the flag will be lowered as we do not wish to incur the risk of any form of enemy retaliation.

On this the 3rd anniversary of our incarceration, and the day of our release Bishop Binsted will now offer a short prayer of thanksgiving.

JANU 7, 1945

LADIES AND GENTLEMEN:

I DO NOT CONSIDER IT OUT OF ORDER TO READ TO YOU AT THIS TIME A NOTICE WHICH WAS ISSUED TO THE CAMP ON OCTOBER 23RD. I THINK YOU WILL ALL REMEMBER THE CIRCUMSTANCES AT THAT TIME AS ONE OF A SERIES OF THE UPS AND DOWNS OF THE CAMP:

"A SERIES OF CIRCUMSTANCES OF LATE HAS GIVEN RISE TO THE EXISTENCE OF A CRISIS FOR THE CAMP. AMONG OTHER THINGS, THE RECENT REMOVAL OF MOST OF THE CAMP TO NEW QUARTERS WAS ACCOMPLISHED AT A TREMENDOUS COST IN ENERGY TO EVERYONE CONCERNED. THE FOOD BEING SERVED TO INTERNEES HAS REACHED AN ALL-TIME LOW, WHILE MALNUTRITION AND ITS ATTENDANT EFFECTS ARE PREVALENT THROUGHOUT THE ENTIRE CAMP.

"IT IS TO BE EXPECTED THAT SOME INDIVIDUALS SHOULD CONSIDER ATTEMPTING TO IMPROVE THEIR OWN CIRCUMSTANCES IN ONE WAY OR ANOTHER WITHOUT REGARD TO THE CONSEQUENCES WHICH MIGHT RESULT TO THEMSELVES OR TO OTHERS. THE COMMITTEE FEELS THAT AT THIS TIME IT IS ITS DUTY TO CIRCULATE A SHORT STATEMENT OF ADVICE AND CAUTION, AND A PLEA FOR COOPERATION FOR THE COMMON GOOD.

"AFTER MORE THAN 1000 DAYS OF INTERNMENT WHICH HAVE BEEN FILLED WITH DESPONDENCY, WORK, AND HUNGER, THE APPROACHING PERIOD MAY PROVE MOMENTOUS. THE COMMITTEE THEREFORE APPEALS TO EVERY INTERNEE TO REMEMBER THAT HIS OBLIGATIONS TO HIMSELF, TO THE CAMP, AND TO HIS COUNTRY, DEMAND THAT HE ABIDE BY THE RULES IN EXISTENCE AND CONTINUE HIS WORK AS AN INTEGRAL PART OF THE COMMUNITY.

"WITH REGARD TO OUR CIVIC OBLIGATIONS, OTHERS ARE DOING THEIR PART AND ARE FULLY CAPABLE OF DOING ALL THAT IS REQUIRED WITHOUT ANY ASSISTANCE FROM US. IT IS NOT TOO MUCH TO ASK THAT WE PLAY OUR PART BY NOT IMPEDING THEM. THE CAMP AS A UNIT CAN BE THE ONLY MEANS OF FOOD DISTRIBUTION, OR OF REACHING THE INDIVIDUAL IN CASE OF NEED.

"REMEMBER THAT BY MAINTAINING OUR PRESENT STATUS WE SERVE OUR OWN ENDS, THOSE OF OTHERS IN THE CAMP, AS WELL AS THOSE OF EVERYONE CONCERNED."

TO PREVENT A MISTAKEN INTERPRETATION OF THE EARLY MORNING CAMP OFFICIAL BROADCAST CONCERNING COMMUNICATION WITH OUR FORCES, WE WISH TO CORRECT THE MISINTERPRETATION OF THE LANGUAGE IN THAT ANNOUNCEMENT TO THIS EFFECT. "A RADIO RECEIVER WAS LEFT BEHIND BY THE COMMANDANT'S STAFF UPON LEAVING THIS MORNING. THIS RECEIVER REQUIRES REPAIR. IT IS HOPED THAT IT WILL BE COMMISSIONED SO THAT A GENERAL NEWS BROADCAST FROM OUR BROADCAST STATIONS WILL BE AVAILABLE FROM THIS SPEAKER AT 6:30 P.M. TODAY."

I SHOULD LIKE TO MAKE AN APPEAL TO EVERYONE IN CAMP TO REFRAIN FROM LOOTING. REMEMBER THAT THE CAMP MAY BE COMPELLED TO LIVE ON ITS OWN RESOURCES FOR A SHORT TIME.

FOR THE BENEFIT OF THOSE INTERNEES WHO HAVE COME INTO POSSESSION OF SUPPLIES AND MATERIALS LATE THE PROPERTY OF THE JAPANESE GOVERNMENT, THEY ARE WARNED THAT UNLESS THIS MATERIAL IS IMMEDIATELY TURNED OVER TO THE DEPARTMENT OF PATROLS THE FURTHER POSSESSION OF THIS MATERIAL AFTER NOON TODAY WILL BE CONSIDERED LOOTING AND SUBJECT TO PROSECUTION. IT IS REALIZED THAT DURING THE EARLY MORNING HOURS IN THE CONFUSION, PEOPLE ACQUIRED PROPERTY INADVERTENTLY AND FOR THOSE WHO HAVE MADE THE REQUEST AS TO DISPOSITION OF SAME, PLEASE FOLLOW THE INSTRUCTIONS JUST MENTIONED. THIS PROPERTY IS NOW COMMUNAL

PROPERTY AND DISPOSITION OF SAME IS IN THE HANDS OF THE CONCERNED COMMITTEE MEMBERS.

REGARDING OUR GATE, I SHOULD LIKE TO MAKE THE FOLLOWING ANNOUNCEMENT ABOUT THE RECEIPT OF SUPPLIES: THE FILIPINO SUPPLIERS ARE COMING INTO THE CAMP AT 2:30 TODAY AND WE HAVE BEEN INFORMED THAT THERE IS PLENTY OF FOOD AVAILABLE IN THE AREA, WHICH WILL BE BROUGHT TO US, AND WE ARE CONTACTING THE COLLEGE AUTHORITIES. SATISFACTORY FINANCIAL ARRANGEMENTS ARE BEING MADE. REGARDING THE VISITS OF RELATIVES (NON-INTERNABLE FAMILIES OR OTHERS) OR FRIENDS AT THE GATE, MR. HARRY STOKES, WITH THE ASSISTANCE OF MR. HANK HEESCH AND HIS RANGERS, WILL BE AT THE GATE AND WILL CALL ANYONE WHO IS ASKED FOR BY OUTSIDERS. WILL ALL RANGERS AND CUBS REPORT TO MR. HEESCH AT THE GATE AT 2:00 P.M. TODAY. ALSO, ANY PERSON IN THE CAMP WHO WISHES TO CONTACT RELATIVES OR FRIENDS NEARBY SHOULD DO SO THROUGH MR. STOKES.

REGARDING THAT ALL-IMPORTANT SUBJECT, FOOD, MEALS FROM HENCEFORTH WILL BE AT 8:00, 12:30, AND 5:00. FOR YOUR INFORMATION, THE MID-DAY MEAL, BECAUSE OF THE SCARCITY OF CAVAS, WILL CONSIST OF ONE COURSE, EITHER RICE OR THE OLD RELIABLE MUSH. BY THE WAY, THE COMMITTEE WISHES TO EXTEND TO THE KITCHEN CREW ITS GREAT ADMIRATION AND THANKS FOR THE MEAL WHICH THEY PUT OUT THIS MORNING AND FOR THE MEALS THEY ARE PUTTING OUT TODAY. AND WHEN WE SAY KITCHEN, WE MEAN THE WOOD CHOPPERS, WHO ARE WORKING TODAY WHILE OTHERS ARE CELEBRATING, AND EVERY OTHER RELATED KITCHEN DETAIL.

SINCE THE CAMP MUST CONTINUE AS USUAL, THE COMMITTEE EXPECTS ALL PERSONS TO CARRY ON THEIR USUAL FUNCTIONS UNDER THE DIRECTION OF THEIR FORMER SUPERVISORS, EXCEPT THOSE WHO MAY HAVE BEEN CALLED UP FOR SPECIAL EMERGENCY WORK.

REGARDING THE HOSPITAL, IT WILL BE OPEN FOR EMERGENCY ONLY AT THE USUAL HOURS.

NOW, REGARDING TWO MATTERS WHICH HAVE BEEN WITH US FOR A LONG TIME. BECAUSE OF THE POSITION IN WHICH WE ARE PLACED NOW, THE COMMITTEE FEELS IT NECESSARY TO CONTINUE THE PRACTICE OF A 10:00 P.M. CURFEW AND ALSO A 10:00 P.M. ROLL CALL. NEEDLESS TO SAY, HOWEVER, YOU NEED NOT BOW AT ROLL CALL. IN FACT, YOU CAN STAY IN BED. BECAUSE WE ARE STILL IN A WAR ZONE, LIGHTS SHOULD BE SHADED AT NIGHT, AS PREVIOUSLY APPROVED BEFORE THE RECENT ALL-OUT BLACKOUTS. LIGHTS MUST BE OUT AT 11:00 P.M.

BECAUSE OF ITS JUXTAPOSITION TO THE GATE, BARRACKS #3, KONICHI'S OLD DEN, WILL BE THE NEW ADMINISTRATION BUILDING. FOR THE NEXT FEW DAYS IT MAY BE NECESSARY TO CALL MONITORS' MEETINGS AT THE DROP OF A HAT. THERE WILL BE A SHORT ONE THIS MORNING AT 11:30 IN BARRACKS #3, THE NEW ADMINISTRATION BUILDING, BY THE GATE.

THERE WILL BE A SPECIAL SHORT THANKSGIVING SERVICE THIS EVENING AT 6:30 P.M. IN BARRACKS #5.

THE ADMINISTRATION COMMITTEE

4 COPIES
January 7, 1945

LADIES AND GENTLEMEN:

I do not consider it out of order to read to you at this time a notice which was issued to the Camp on October 23rd. I think you will all remember the circumstances at that time as one of a series of the ups and downs of the Camp:

"A series of circumstances of late has given rise to the existence of a crisis for the Camp. Among other things, the recent removal of most of the Camp to new quarters was accomplished at a tremendous cost in energy to everyone concerned. The food being served to internees has reached an all-time low, while malnutrition and its attendant effects are prevalent throughout the entire Camp.

"It is to be expected that some individuals should consider attempting to improve their own circumstances in one way or another without regard to the consequences which might result to themselves or to others. The Committee feels that at this time it is its duty to circulate a short statement of advice and caution, and a plea for cooperation for the common good.

"After more than 1000 days of internment which have been filled with despondency, work, and hunger, the approaching period may prove momentous. The Committee therefore appeals to every internee to remember that his obligations to himself, to the Camp, and to his Country, demand that he abide by the rules in existence and continue his work as an integral part of the community.

"With regard to our civic obligations, others are doing their part and are fully capable of doing all that is required without any assistance from us. It is not too much to ask that we play our part by not impeding them. The Camp as a unit can be the only means of food distribution, or of reaching the individual in case of need.

"Remember that by maintaining our present status we serve our own ends, those of others in the Camp, as well as those of everyone concerned."

To prevent a mistaken interpretation of the early morning camp official broadcast concerning communication with our forces, we wish to correct the misinterpretation of the language in that announcement to this effect. "A radio receiver was left behind by the Commandant's staff upon leaving this morning. This receiver requires repair. It is hoped that it will be commissioned so that a general news broadcast from our broadcast stations will be available from this speaker at 6:30 p.m. today."

I should like to make an appeal to everyone in Camp to refrain from looting. Remember that the Camp may be compelled to live on its own resources for a short time.

For the benefit of those internees who have come into possession of supplies and materials late the property of the Japanese Government, they are warned that unless this material is immediately turned over to the department of patrols the further possession of this material after noon today will be considered looting and subject to prosecution. It is realized that during the early morning hours in the confusion, people acquired property inadvertently and for those who have made the request as to disposition of same, please follow the instructions just mentioned. This property is now communal property and disposition of same is in the hands of the concerned committee members.

Regarding our gate, I should like to make the following announcement about the receipt of supplies: The Filipino suppliers are coming into the Camp at 2:30 today and we have been informed that there is plenty of food available in the area, which will be brought to us, and we are contacting the College authorities. Satisfactory financial arrangements are being made. Regarding the visits of relatives (non-internable families or others) or friends at the gate, Mr. Harry Stokes, with the assistance of Mr. Hank Heesch and his Rangers, will be at the gate and will call anyone who is asked for by outsiders. Will all Rangers and Cubs report to Mr. Heesch at the gate at 2:00 p.m. today. Also, any person in the Camp who wishes to contact relatives or friends nearby should do so through Mr. Stokes.

Regarding that all-important subject, food, meals from henceforth will be at 8:00, 12:30, and 5:00. For your information, the mid-day meal, because of the scarcity of cawas, will consist of one course, either rice or the old reliable mush. By the way, the Committee wishes to extend to the Kitchen crew its great admiration and thanks for the meal which they put out this morning and for the meals they are putting out today. And when we say Kitchen, we mean the wood choppers, who are working today while others are celebrating, and every other related Kitchen detail.

Since the Camp must continue as usual, the Committee expects all persons to carry on their usual functions under the direction of their former supervisors, except those who may have been called up for special emergency work.

Regarding the Hospital, it will be open for emergency only at the usual hours.

Now, regarding two matters which have been with us for a long time. Because of the position in which we are placed now, the Committee feels it necessary to continue the practice of a 10:00 p.m. curfew and also a 10:00 p.m. roll call. Needless to say, however, you need not bow at roll call. In fact, you can stay in bed. Because we are still in a war zone, lights should be shaded at night, as previously approved before the recent all-out blackouts. Lights must be out at 11:00 p.m.

Because of its juxtaposition to the Gate, Barracks #3, Konichi's old den, will be the new Administration Building. For the next few days it may be necessary to call monitors' meetings at the drop of a hat. There will be a short one this morning at 11:30 in Barracks #3, the new Administration Building, by the gate.

There will be a special short thanksgiving service this evening at 6:30 p.m. in Barrack #5.

THE ADMINISTRATION COMMITTEE

LOS BAÑOS INTERNMENT CAMP
ADMINISTRATION COMMITTEE

No. 169

J. Pal.
August 28, 1944

Major Y. Iwanaka
Commandant, Los Baños
Internment Camp

Sir:

Re: Marking buildings.

When Japanese nationals were interned at Camp John Hay in Baguio during the early part of the war they were permitted to mark the buildings in which they were housed with a Japanese flag and other marks of identification.

While we are making preparation for blackouts and taking other precautions it would be of infinite value to the safety of the camp if the following signs on the roofs of buildings could be made:

1. Red Crosses on the Hospital and Building D, (The Hospital Annex).
2. An American flag and the words, U.S.A., or other identifying mark on the Gym Building.

As non-combatants and in order to safeguard the women and children in the camp, the Committee feels that these precautions should be taken.

It will be appreciated if your permission can be granted for this.

Respectfully

W. H. Fonger
W. H. FONGER
Chairman

LOS BAÑOS INTERNMENT CAMP
ADMINISTRATION COMMITTEE

May 13, 1944.

No. 27

Mr. E. Tanaka,
Commandant,
Los Baños Internment Camp.

Sir:

You informed the Committee on May 12th that consideration is being given to the transfer of an indefinite number of persons from the Manila Camp to the Los Baños Camp at a future date.

The Committee has repeatedly pointed to the dangers involved in adding to the population of the Los Baños Camp, without correcting the inadequacies which exist. Written protests were filed on March 24th and April 5, and yet few of the requests referred to in those protests have been rectified. With the prospect of additional transfers to the Los Baños Camp, the Committee must call attention to the desperate circumstances which are existing in the Camp, and must inform you that it cannot assume the responsibility for the conditions which will undoubtedly arise from any increase in the Camp population.

The following factors which have been repeatedly called to your attention orally, and which have been stressed in our written petitions, are again called to your attention, with the warning that they will become aggravated with an increase in the Camp.

Kitchen and Food

Without concrete flooring and the construction of vegetable cleaning shed, our kitchen is working under a handicap at present. With these corrections and the addition of a hot water system for sanitation purposes and the rebuilding of one battery of fire boxes, the capacity of the kitchen for regular working is estimated at 2,000 persons. Conditions are such that at present it has been impossible for the kitchen to set up a Diet Kitchen for small children. The Kitchen facilities for supplying food for the Camp must be improved.

Assurance is required that sufficient ^{1/}meat, vegetables, camotes, coconuts, beans, etc., can be provided for whatever increase is contemplated. If the Camp population increases, this problem will become acute. Our Canteen, which has served as an important source of supplements to the meager camp diet, has been unable to obtain the quantities of fruits and vegetables for the present Camp population. Since the last transfer of 500 persons to the Camp on April 6 and 7, it has been necessary to permit individuals in the Camp to make purchases only on alternate days, and even under this arrangement the supply of produce from the surrounding area has been insufficient to supply the needs of the Camp. Purchases of such important food adjuncts as eggs, bananas, sugar and many other items have been greatly curtailed. It is apparent that the area surrounding

6

Mr. E. Tanaka -No. 27

the Camp and the difficulties of transportation will make it impossible to supply adequate quantities of commodities for a larger camp. Also, there is an acute shortage of serving pots, cawa covers, and other necessary equipment.

Hospital

No progress whatsoever has been made on the proposal advanced last February to build an extension to the Hospital. The Committee's alternative plan that one of the permanent buildings of the Camp be converted into a Hospital Annex must depend upon the equipment necessary for setting up such a separate unit. The Camp is willing to make much of the equipment which would be necessary if material could be supplied to us, but a large number of items would have to be supplied by the Japanese Authorities. However, to date we have not been supplied with any of the materials necessary for making some of the equipment ourselves, nor have we been supplied with any of the equipment which must be purchased on the outside.

Our present Hospital is now working with a minimum of equipment. Without the enlarged building facilities they cannot expand their bedding capacity and without proper equipment, the Hospital Annex cannot be set up.

The Camp has been extremely fortunate in not having had an epidemic during the continued water shortage, and with the fly season beginning now, without adequate sanitation equipment and without proper hospital equipment, the Health Department can only view the proposed transfer as a grim prospect.

Barracks

Although Colonel Urabe assured the Committee on his departure from the Camp on April 25th that Headquarters would be apprised of the matter of strengthening of the barracks, nothing has been done to date to prevent a culmination of a situation which can only result in injury and death of occupants of the barracks with the approaching rain and typhoon season. Nothing has been done toward providing a refuge to serve in the event of typhoons or other emergencies.

Water

During the week preceding the arrival of the last 500 transferees, a serious water shortage was experienced by the Camp. Since that time there have been few occasions when water has been sufficient throughout the Camp to meet the all important needs for sanitation purposes. An attempt has been made by the Authorities to rectify the water shortage by the installation of a new reservoir and an additional 2-1/2" pipe line into the Camp; however, Mr. Arick has repeatedly, in his letters of April 14, 24, 28, May 6 and 11, warned of the ineffectiveness of the measures which have been taken. Without relief from the difficulty, with the dry season to continue for another few months, and with the advent of the fly season which is now beginning, the present difficulties

Mr. E. Tanaka -No. 27.

of the Camp with regard to water are only a portent to diseases, epidemics and inevitable loss of life which must result.

Sanitation

Sanitation supplies, such as garbage drums, lime, and other articles, are badly needed at the present time and the problems of the Sanitation Department will be aggravated with the advent of additional people.

Miscellaneous

With the rainy months approaching, and with the transfer of a majority of the Camp to the barracks area, steps must be taken to provide proper roadways and paths through the Camp. Adequate transportation facilities must be provided, for at the present time we badly need additional cars and tires.

The above constitutes only a summary of the most serious problems confronting us now. For a more complete recapitulation of these problems, the Committee wishes to refer you to our protests of March 24 and April 5. In spite of those protests, 530 persons were transferred to the Camp on April 6th and 7th and yet nothing has been done to correct the inadequacies of the Camp. If additional people are to be transferred the Committee can only point to the responsibility of the Japanese Authorities for the life, health and safety of all internees.

Respectfully yours,

W. H. FONGER
CHAIRMAN

L. T. WATTY

M. R. ARICK

8

MANILA INTERNMENT CAMP
(Santo Tomas University)
Manila, Philippines

December 16th, 1943

His Excellency
The Swiss Minister
Representative of Protecting Power
Tokyo, Japan

Sir:

The mv. "Teia Maru" with a large shipment of relief supplies, parcel post and mail for War Prisoners and Civilian internees arrived in Manila on or about November 8th, 1943. Part of the allotment of such supplies for the internees under the control of the Manila Internment Camp were deposited by the Japanese Military Authorities in that Camp, under their direction and control, on November 30th, 1943. Some of the supplies have not yet been delivered but are expected.

Despite repeated requests by the agents of Internees for the early release and delivery of all the above supplies, no action was taken by the Japanese Military Authorities until December 15th, 1943. On that date the Military Authorities commenced inspection of Comfort Kits containing food supplies. During that inspection all packages were torn open, the contents removed and subjected to inspection. Cans and other containers of food-stuffs from two kits were opened. This was done in the presence of many internees. After inspection the contents of the kits were replaced in their cartons, with the exception of cigarettes, and released for delivery to internees. The inspection and release to Internees of comfort kits is now continuing.

None of the other relief supplies has yet been inspected and released for delivery to internees. Medical Supplies, many of which are unobtainable locally, are urgently needed and have been for many months past.

None of the mail or parcel post which arrived on the "Teia Maru" has yet been released and distributed; despite repeated requests no definite information can be obtained as to when they will be released and distributed.

In view of the above, we respectfully submit the following complaints:

- (a) The release and delivery of relief supplies has been unnecessarily delayed.
- (b) The manner of inspection of comfort kits has been harsh.
- (c) The mail and parcel post for Internees have not yet been released and distributed and no definite information has been given as to when they will be released.

We respectfully request your Excellency to take the necessary action to mitigate these conditions.

Yours respectfully,

THE EXECUTIVE COMMITTEE OF
MANILA INTERNMENT CAMP

C. C. GRINNELL
Chairman

MANILA INTERNMENT CAMP
 (Santo Tomas University)
 Manila, Philippines

December 16th, 1943

His Excellency
 The Swiss Minister
 Representative of Protecting Power
 Tokyo, Japan

Sir:

The mv. "Teia Maru" with a large shipment of relief supplies, parcel post and mail for War Prisoners and Civilian Internees arrived in Manila on or about November 6th, 1943. Part of the allotment of such supplies for the internees under the control of the Manila Internment Camp were deposited by the Japanese Military Authorities in that Camp, under their direction and control, on November 30th, 1943. Some of the supplies have not yet been delivered but are expected.

Despite repeated requests by the agents of Internees for the early release and delivery of all the above supplies, no action was taken by the Japanese Military Authorities until December 15th, 1943. On that date the Military Authorities commenced inspection of Comfort Kits containing food supplies. During that inspection all packages were torn open, the contents removed and subjected to inspection. Cans and other containers of food-stuffs from two kits were opened. This was done in the presence of many internees. After inspection the contents of the kits were replaced in their cartons, with the exception of cigarettes, and released for delivery to internees. The inspection and release to Internees of comfort kits is now continuing.

None of the other relief supplies has yet been inspected and released for delivery to internees. Medical Supplies, many of which are unobtainable locally, are urgently needed and have been for many months past.

None of the mail or parcel post which arrived on the "Teia Maru" has yet been released and distributed; despite repeated requests no definite information can be obtained as to when they will be released and distributed.

In view of the above, we respectfully submit the following complaints:

- (a) The release and delivery of relief supplies has been unnecessarily delayed.
- (b) The manner of inspection of comfort kits has been harsh.
- (c) The mail and parcel post for internees have not yet been released and distributed and no definite information has been given as to when they will be released.

We respectfully request your Excellency to take the necessary action to mitigate these conditions.

Yours respectfully,

THE EXECUTIVE COMMITTEE OF
 MANILA INTERNMENT CAMP

C. C. GRINNELL
 Chairman

NOTICE TO MONITORS

Edlin
September 9, 1943

FOOD DIVISION - Supplementing the Statement of Policy dated September 9th covering the reorganization of the Food Division and the appointments confirmed therein, as posted, the following progress to date is announced:

Paul Florence, Captain of Crew A, took over the preparation of food in the new kitchen on Sept. 5th. The meals served from Sept. 5th to 9th inclusive were planned by him and prepared and cooked by Crew A. Thanks are due to Paul Florence and his crew for their excellent work under difficult conditions in the new kitchen.

A newly organized Crew B commences in the kitchen tomorrow, Sept. 10th, with Earl Spear as Captain, and will turn out that day's meals, alternating daily thenceforth with Crew A until the latter part of next week when it is expected that a third crew, Crew C, will be in operation, to put into effect the policy of three crews of cooks working on a "day on, two days off" basis.

Date of Expiration Sept. 14, 1943

LOS BAÑOS INTERNMENT CAMP
ADMINISTRATION COMMITTEE

To: Mr. S. C. Pinkerton
From: Secretary, Administration Committee

September 9, 1943

Subject: Reorganization of Food Division - Statement of Policy

At its regular meeting of September 7, 1943, the Administration Committee adopted the following plan and principles for the reorganization of the Food Division:

OBJECTIVE OF REORGANIZATION:

To make the most use of our available supplies and equipment in providing wholesome and palatable food for the Camp.

To use the best talent available in the Camp in the preparation of food, as ingenuity and a desire to improve the food must make up for the deficiencies of supplies and equipment.

PERSONNEL:

- (1) Administration Committee member (known as the Food Administrator) - shall be responsible for food of the Camp.
- (2) Assistant in Charge of Kitchens - shall serve as adviser on meal planning, cooking, and kitchen equipment.
- (3) Assistant in Charge of Outside Operations - shall coordinate the functions of
 - (a) Butcher Shop
 - (b) Vegetable and rice cleaning
 - (c) Coconut Milk manufacturing
 - (d) Kitchen Services: firewood, etc.
 - (e) Serving
- (4) (Three) Captains - Shall be individually in charge of three kitchen cooking crews.
- (5) Food custodian - shall be responsible for accountability of food, and other supplies entrusted to his custody, and shall be in charge of bodegas, accounting, and the transportation unit.
- (6) Purchasing Agent - shall be responsible for the procurement of food from the local suppliers.

PLANNING:

- (1) Operating Committee - Composed of Food Administrator; one other member of the Administration Committee; two assistants of the Division; and three Monitors.

The Committee shall assist the Food Administrator in determining the operating policies to be followed by the Food Division, including the Camp and Hospital Kitchens.

11

The Committee shall have the authority to appoint personnel and to determine methods, subject to confirmation by the Administration Committee.

- (2) Menu Committee - Composed of Assistant in Charge of Kitchens (Chairman); Dietitian; representative of Medical Director; Purchasing Agent, and three Crew Captains.

METHODS OF REORGANIZATION TO MEET SPECIFIC PROBLEMS:

- (1) Relieve camp from complete dependence on any one group of Kitchen workers -- Preparation of food in the Kitchen by three crews, which is a method that has resulted in improvements at Santo Tomas. Each crew to consist of a complement of 8 to 10 men, to work in shifts under a Captain, who will be in charge of the preparation of the morning, noon, and evening meals every third day.
 - (a) Paul Florence shall be authorized to organize one crew, which shall take over the preparation of food, beginning September 5th, with the understanding that two additional crews will be organized to alternate with his men within a fortnight.
- (2) Trained men for future requirements -- The multiple-crew organization is intended to develop new talent. In addition, the Food Division should conduct a survey of the entire camp personnel for additional men with special aptitude for cooking.
- (3) Kitchen privileges -- Special privileges are to be eliminated, with the exception that kitchen staff actually on duty during the meal hour may be served in the kitchen; they are entitled to generous helpings of the food being served at that meal.

A coffee ration for the day shall be issued to the Crew Captain which shall provide two cups of coffee for each of his men who are on duty during the day. The coffee ration shall not include sugar.

The Hospital Kitchen staff shall be issued uncooked standard rations for the day to provide for each member of the kitchen staff, with the privilege of preparing the food so issued in the Hospital Kitchen. The Hospital Kitchen staff shall be entitled to the same coffee ration as those working in the Camp Kitchen.

It is intended that the food for the internees shall be improved as much as possible under present conditions, and that everyone shall share alike in the same diet. The improvement in the line food contemplates the elimination of all special meals now being served within the Camp. While it is true that special food was granted to cooks in the early days at Santo Tomas, this is no longer possible in view of the present limitations of supply.

- (4) Elimination of shortages -- The Custodian shall be responsible for the accountability of Camp food supplies.
- (5) Eliminate wastage -- Standardize the line ration with the preparation of only that amount which will meet the requirements, thus reducing waste to a minimum.

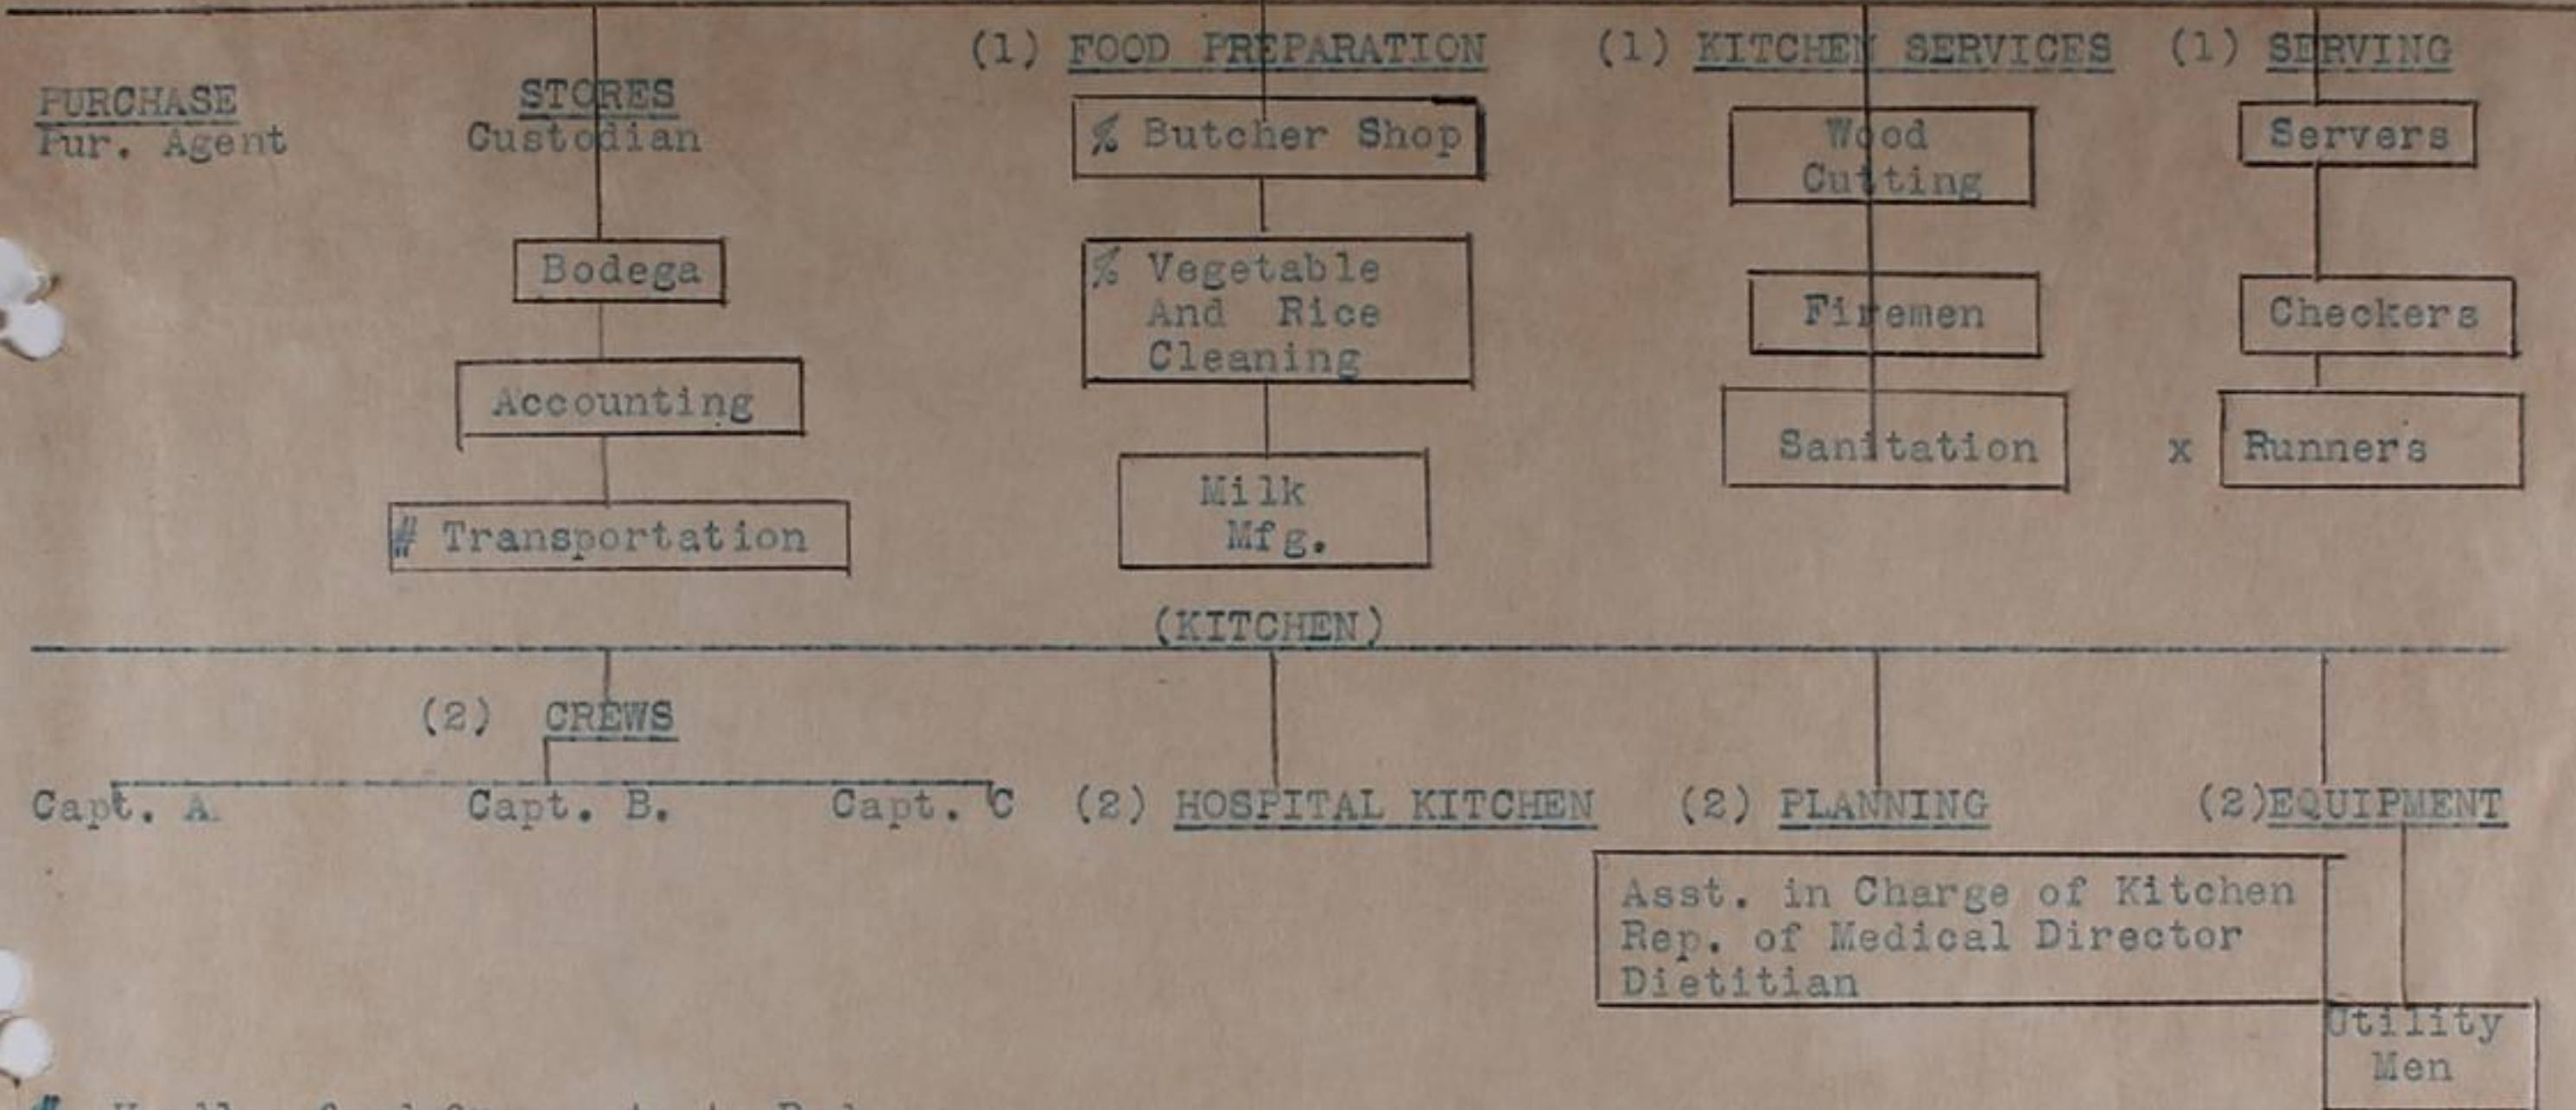

In drawing the day's food ration, the Hospital shall indicate the number of patients eating at the Hospital, showing whether they have been prescribed a full, medium, or liquid diet.
- (6) Improved palatability -- Careful preparation of each meal, taking advantage of the competitive spirit between crews.
- (7) Provide variety -- Careful planning of meals by the Menu Committee, which shall study the local foodstuffs and recipes. Menus for the week to be drafted in advance by the Assistant in Charge of Kitchens, the Dietitian, the representative of the Medical Director, the Purchasing Agent, and the three Crew Captains.
- (8) Maximum value from food -- The Operating and Menu Committees shall take full advice of the Dietitian and the representative of the Medical Director in obtaining the maximum food value and balance of diet from the available supplies. Special attention to be given the conserving of food values in broths and the developing of substitutes to provide required nutritional values.
- (9) Insure cleanliness -- Daily inspection and report on Kitchen cleanliness by representatives of the Health Division.
- (10) Liaison with internees -- Present Monitors' representatives to be incorporated into the Operations Committee to bring suggestions of the internees; also the introduction of a suggestion box where internees may submit constructive ideas for the improvement of Camp food.
- (11) Coordination of Food Division -- Current policies of Food Division to be determined by an Operating Committee - consisting of representatives from the Administration Committee, the staff officers, and the Monitors.

LOS BAÑOS INTERNMENT CAMP
ADMINISTRATION COMMITTEE

August 23, 1943

Memorandum to: MR. C.W. WOODIN, Camp Monitor

Subject: CAMP SHORT ORDER RESTAURANT

Since a mistaken impression evidently exists in some quarters of the Camp regarding the proposed Camp Short Order Restaurant, I thought I should take this opportunity to review the whole question, so that you can explain the position to the Monitors for the purpose of preventing the dissemination of misinformation.

As you know, the Committee after careful study and in an endeavor to profit from the experience gained at Santo Tomas, reached the conclusion that it would be to the interests of the Camp to establish a Camp Short Order Restaurant in conjunction with the Camp Canteen.

The subject, you will recall, was first considered some weeks ago and at the time was discussed with the Monitors, but action was postponed since the necessary equipment and materials were not available. Since then we have been fortunate in obtaining much of the equipment and materials without cost.

The proposed location under consideration is Cottage No. 9, now occupied by the reference library of the Department of Education which could conveniently be transferred to the lower portion of the Administration Building adjacent to the present class rooms.

The policy in operating the restaurant would be to serve short order dishes, avoiding fancy meals; in other words a simple fare at minimum prices. As in the case of the Camp Canteen, the profit would be limited, not to exceed 10%.

Since it would be a camp project, it will be operated by internees, without compensation, similar to other camp details, such as the Canteen, Construction Department, et al.

Supplies are, of course, becoming more difficult to obtain, which is to be expected in a country which has been under military occupation for nearly two years. This problem has not been overlooked, but it is believed by resourcefulness and by employment of suitable local substitutes, a satisfactory menu can be offered.

The fundamental principle that "the camp comes first" remains unaltered; the camp will continue to have first call on available supplies, the Canteen and its auxiliaries to come next.

The reasons prompting favorable consideration of the project by the Committee may be summarized as follows:

- (a) It is believed that there is a real demand in the Camp for such facilities. If this is correct, and the Camp is not prepared to fill this need, there will arise in time the question whether the opportunity should be denied to private enterprise.
- (b) If operated as a camp enterprise, private gain is eliminated and proper facilities can be installed to ensure satisfactory sanitation standards.
- (c) Those who patronize the restaurant will automatically be contributing to the Camp Welfare Fund and at the same time, it will relieve a certain demand on the Camp Kitchen Line making available extra food for others.
- (d) At present there are many men who do not possess the necessary cooking equipment, nor have the available time to prepare meals and the restaurant will offer an equal opportunity to all to purchase prepared food, thus resulting in a wider distribution of supplies acquired by the Canteen.

While the preponderance of opinion among the internee body evidently favors the project, there appears to be some confusion in the minds of a few individuals. Incidentally, their principle arguments appear to be directed not against the idea of the Camp Restaurant, but to concern other pertinent questions, already under consideration.

It will be a week or more before the work can be started, and in the meantime, I should appreciate your asking the Monitors to canvas informally their sections to ascertain the general feeling of their men for, or against, the project.

For the guidance of the Committee, will you please be prepared to present the results at the meeting on Friday evening next, August 27th, when it is anticipated final action will be taken on the proposal.

Many thanks.

A.D. CALHOUN
Chairman

ADC/fm

LOS BAÑOS INTERNMENT CAMP
ADMINISTRATION COMMITTEE

August 19, 1943

Mr. George H. Bissinger:

Dear Mr. Bissinger:

Replying to your memorandum of August 16, there is little I can add at the moment to my previous statements. The Commandant has reiterated that the fundamental policy in regard to making this camp the center for internment of enemy nationals in the Philippines remains unchanged. The only modification is the delay in effecting the transfers so as to permit certain improvements in the buildings and facilities.

Actually this camp is separate and independent of Santo Tomas, and the relationship is no different from that of Baguio or Davao. The policy of isolation from the outside world is equally applicable to all of these camps and while you may logically reason there can therefore be no harm in free uncensored communication between the camps, this is not the attitude of the authorities. There have been occasions where our censors have passed messages, but the authorities have deleted parts or have thrown out the message entirely. Since they are dictating the policy, any modification presupposes their approval.

In times of war, particularly in a zone of hostilities, we are all called upon to make sacrifices and suffer inconveniences. As you know, there are many among us who have not had any word from our families in nearly two years. We should also not forget there are two million or more fellow countrymen on the various fronts scattered over the world.

I have tried previously to make it clear that I am conscious of the natural desire of the married men in this camp to be reunited with their families in Santo Tomas. I have already given my personal assurance that I will do my utmost to arrange for the reunion of the families before the threat of hostilities in this area. The authorities have declined to entertain at this time any proposal for the return of the married men to Santo Tomas. I have succeeded in obtaining their agreement, provided it does not conflict with the plans of the contractor, to arrange if possible for a unit of two barracks to be completed in advance of the others, thus permitting the earlier transfer of the families to Los Baños. In this connection the Commandant has indicated that the earliest date we may expect the first transfer to be effected is one month and the latest, two months.

I feel confident that you would not intentionally urge a policy which would place in jeopardy the health and lives of 6000 to 7000 men, women, and children non-combatants. In the meantime I believe everything within reason has been done to present the position of the married men before the authorities, and you may rest assured that we have no intention of relaxing our efforts.

Outline of Problems
Confronting Establishment of L.B.I.C.

1. PROBLEMS ARISING FROM TRANSFER OF AGED (OVER 60 YEARS), OF WHICH IT IS ESTIMATED THAT 600 ARE CHRONIC INVALIDS.

(a) Hardships of the trip will aggravate condition of more serious cases, with probable risk of fatal results.

(b) No existing provision for proper medical and hospital care in Los Baños area.

(c) Many patients will of necessity have to make trips regularly to Manila for specialized treatment.

(d) Daily supplies of foodstuffs (milk, etc.) required for special diets will have to be obtained from Manila.

COMMENT: In the circumstances, humane considerations prompt the suggestion that these infirm cases be left in Manila, where suitable accommodations are available.

2. HOUSING ACCOMODATIONS

(a) Type of construction should afford adequate protection against weather, for which present sawali walls are not sufficient, unless protected by media aguas.

(b) Standard flush toilets, serviced by septic tanks of adequate capacity, in the proportion of not less than one toilet to each 20 individuals, together with sufficient shower baths and wash stands, are an elemental necessity in order to maintain normal hygiene standards.

(c) Cement floors for dormitories, kitchens and bathrooms are essential, in order to maintain proper sanitary conditions for protection of health.

COMMENT: The population of 7,000 will be composed of men, women and children, ranging from infants to extreme old age, in varying conditions of health, which factors should be taken into consideration in providing suitable housing accommodations.

3. SUBSISTANCE

(a) Suitable kitchen facilities are a primary necessity in order to provide for the different types of diet for such a mixed population.

(b) Owing to the limited crops produced in this area, a camp with a population of 7,000 will be dependent upon distant markets, and for the transport of these supplies regular trucking and rail facilities must be assured.

(c) In view of the lack of available dairy products in this vicinity, milk would have to be transported daily from Manila for the feeding of children and invalids.

(d) In the absence of facilities for cooking by gas or electricity, it is estimated that for a camp of 7,000, not less than 200 cords of firewood will be required monthly, for which a dependable source of supply must be available.

4. HOSPITAL FACILITIES

(a) Against the existing hospital facilities of only 25 beds,

(con't)

HOSPITAL FACILITIES (con't.)

(a-con't.) it is estimated that for a population of 7,000 the minimum requirements would be a 350 bed hospital, supplemented by the conversion of two barracks with special facilities into a convalescent home for approximately 200 persons.

(b) For the care of 600 aged and invalids, six barracks would have to be converted into sanitariums, with the addition of special facilities.

(c) At least two clinics would have to be provided for the treatment of minor injuries and illness.

COMMENT: As a result of protracted internment the general resistance of the internees has been lowered, resulting in a higher rate of illness. While under normal conditions many of these cases would receive treatment in their homes, in the present circumstances of internment, segregation is necessary to prevent spread of infection, and for patients to receive proper care. The existing hospital is barely adequate to care for the present 800, making it imperative that additional facilities be provided prior to any expansion in the population.

5. GENERAL HEALTH PROBLEMS

(a) An adequate water supply is vital to the very existence of a community. For the mixed population of 7,000, and the essential Camp functions, it is conservatively estimated that 50 gallons daily per capita, or a total of 350,000 gallons per day, will be required. A minimum of 14,000 gallons per day of this supply should be potable water, conveniently available for drinking purposes.

(b) For a community the size of 7,000, the garbage disposal question presents a real problem and, if incinerators are not to be supplied, arrangements will have to be made for the daily collection and disposal by the Department of Public Health.

(c) Malaria is endemic in this area, and can only be controlled by constant eradication work on the six miles of neighboring streams. Since this work has been neglected, an ample supply of quinine is essential for effective curative treatment.

COMMENT: The importance of these aspects of the public health problem cannot be overemphasized.

6. EDUCATION

(a) Due to the prolonged period of internment, suitable provision for education of the approximately 800 children of school age is an inescapable responsibility.

COMMENT: If arrangements are made for care of the 600 aged and invalids in Manila, it will release, without additional expense, the necessary buildings for schools, churches and recreation requirements of the Camp.

7. PROGRAM FOR FUTURE TRANSFERS TO THIS CAMP

COMMENT: In envisaging the future growth of the Camp, the graduated expansion in groups of approximately 500 has the following manifest advantages:

(a) Provides an opportunity to develop local sources of supply, rather than leaving the Camp wholly dependent on distant markets, with transportation difficulties and uncertain flow of supplies.

(b) Permits the orderly absorption of each group and correction of faults, before arrival of the next group.

The alternative plan for an abrupt increase in the population from 800 to 7,000 would inevitably produce complicated and serious supply, transportation and health problems.

OUTLINE OF PROBLEMS
CONFRONTING ESTABLISHMENT OF L.B.I.C.

1. PROBLEMS ARISING FROM TRANSFER OF AGED (OVER 60 YEARS), OF WHICH IT IS ESTIMATED THAT 600 ARE CHRONIC INVALIDS.

(a) Hardships of the trip will aggravate condition of more serious cases, with probable risk of fatal results.

(b) No existing provision for proper medical and hospital care in Los Baños area.

(c) Many patients will of necessity have to make trips regularly to Manila for specialized treatment.

(d) Daily supplies of foodstuffs (milk, etc.) required for special diets will have to be obtained from Manila.

COMMENT: In the circumstances, humane considerations prompt the suggestion that these infirm cases be left in Manila, where suitable accommodations are available.

2. HOUSING ACCOMMODATIONS

(a) Type of construction should afford adequate protection against weather, for which present sawall walls are not sufficient, unless protected by media aguas.

(b) Standard flush toilets, serviced by septic tanks of adequate capacity, in the proportion of not less than one toilet to each 20 individuals, together with sufficient shower baths and wash stands, are an elemental necessity in order to maintain normal hygiene standards.

(c) Cement floors for dormitories, kitchens and bathrooms are essential, in order to maintain proper sanitary conditions for protection of health.

COMMENT: The population of 7,000 will be composed of men, women and children, ranging from infants to extreme old age, in varying conditions of health, which factors should be taken into consideration in providing suitable housing accommodations.

3. SUBSISTANCE

(a) Suitable kitchen facilities are a primary necessity in order to provide for the different types of diet for such a mixed population.

(b) Owing to the limited crops produced in this area, a camp with a population of 7,000 will be dependent upon distant markets, and for the transport of these supplies regular trucking and rail facilities must be assured.

(c) In view of the lack of available dairy products in this vicinity, milk would have to be transported daily from Manila for the feeding of children and invalids.

(d) In the absence of facilities for cooking by gas or electricity, it is estimated that for a camp of 7,000, not less than 200 cords of firewood will be required monthly, for which a dependable source of supply must be available.

(e) Provision for a railway siding and adequate warehousing facilities will be necessary, in order to handle the volume of supplies.

COMMENT: In contrast to a metropolitan center like Manila, which regularly receives supplies by rail, truck and steamer from all parts of the Philippines, the isolated rural situation of this Camp involves complicated supply and transportation problems.

4. HOSPITAL FACILITIES

(a) Against the existing hospital facilities of only 25 beds, it is estimated that for a population of 7,000 the minimum requirements would be a 350 bed hospital, supplemented by the conversion of two barracks with special facilities into a con-

4. HOSPITAL FACILITIES (Continued)

valercent home for approximately 800 persons.

(b) For the care of 800 aged and invalids, six barracks would have to be converted into sanitariums, with the addition of special facilities.

(c) At least two clinics would have to be provided for the treatment of minor injuries and illness.

COMMENT: As a result of protracted internment the general resistance of the internees has been lowered, resulting in a higher rate of illness. While under normal conditions many of these cases would receive treatment in their homes, in the present circumstances of internment, segregation is necessary to prevent spread of infection, and for patients to receive proper care. The existing hospital is barely adequate to care for the present 800, making it imperative that additional facilities be provided prior to any expansion in the population.

5. GENERAL HEALTH PROBLEMS

(a) An adequate water supply is vital to the very existence of a community. For the mixed population of 7,000, and the essential Camp functions, it is conservatively estimated that 50 gallons daily per capita, or a total of 350,000 gallons per day, will be required. A minimum of 14,000 gallons per day of this supply should be potable water, conveniently available for drinking purposes.

(b) For a community the size of 7,000, the garbage disposal question presents a real problem and, if incinerators are not to be supplied, arrangements will have to be made for the daily collection and disposal by the Department of Public Health.

(c) Malaria is endemic in this area, and can only be controlled by constant eradication work on the six miles of neighboring streams. Since this work has been neglected, an ample supply of quinine is essential for effective curative treatment.

COMMENT: The importance of these aspects of the public health problem cannot be overemphasized.

6. EDUCATION

(a) Due to the prolonged period of internment, suitable provision for education of the approximately 800 children of school age is an inescapable responsibility.

COMMENT: If arrangements are made for care of the 800 aged and invalids in Manila, it will release, without additional expense, the necessary buildings for schools, churches and recreation requirements of the Camp.

7. PROGRAM FOR FUTURE TRANSFERS TO THIS CAMP

COMMENT: In envisaging the future growth of the Camp, the graduated expansion in groups of approximately 500 has the following manifest advantages:

(a) Provides an opportunity to develop local sources of supply, rather than leaving the Camp wholly dependant on distant markets, with transportation difficulties and uncertain flow of supplies.

(b) Permits the orderly absorption of each group and correction of faults, before arrival of the next group.

The alternative plan for an abrupt increase in the population from 800 to 7,000 would inevitably produce complicated and serious supply, transportation and health problems.

Outline of Problems
Confronting Establishment of L.B.I.C.

1. PROBLEMS ARISING FROM TRANSFER OF AGED (OVER 60 YEARS), OF WHICH IT IS ESTIMATED THAT 600 ARE CHRONIC INVALIDS.

(a) Hardships of the trip will aggravate condition of more serious cases, with probable risk of fatal results.
